

SOP: Updated Blog Content (Content Refresh)

Purpose

Improve performance, accuracy, and search alignment of **existing blog content** through structured updates, research, and on-page optimization.

Scope

Applies to **already-published blog articles** that require SEO improvements.

Process

1. Page Review & Baseline

- Open the live article
 - Identify:
 - Current rank for target kw for last 28 days (in google search console)
 - Weak or unclear intro
 - Missing or weak CTA
 - Thin sections or gaps
 - Missing data, stats, or sources
 - Poor internal linking
-

2. Research & SERP Validation (Required)

- Review the **top 3 non-Wikipedia SERP results** for the target keyword
 - Reference SERP via **Ahrefs Keyword Overview**
- Confirm:

- All major subtopics are covered
 - No user-intent gaps (e.g. cost, eligibility, risks, FAQs)
 - Research and validate:
 - Updated stats or data points
 - Government, academic, or peer-reviewed sources (no competitors)
-

3. Update Content

- Update or rewrite sections as needed using the client's Claude project
 - First sentence must follow this format: (semantic triple)
[KEYWORD] is ... [clear, concise 1-sentence definition]
 - Ensure:
 - CTA exists above the fold
 - Heading structure (H2/H3) is logical and complete
 - Add links:
 - **External links**
 - 1–2 authoritative sources supporting factual claims
 - **Internal links**
 - Ensure 3+ internal links
 - First internal link should support the primary service tied to the content
-

4. On-Page QA

Verify on the live page:

- CTA above the fold
- Heading structure makes sense and is properly formatted
- Image includes descriptive, keyword-aligned alt text
- SEO title and meta description:

- Present
- Accurate
- Not truncated
- All internal and external links resolve correctly

! Fix all issues before proceeding.

5. Post Update

- Add links **to this updated article** from **3–6 relevant existing pages**
 - Use contextual, non-generic anchor text
-

6. Finalize & Log

Part 1: In Airtable

- Update status to **Live**
- Update **Published Date**
- Remove Due Date
- In the record's AT **Notes** section drop in the following:
 - your initials & the date, the target keyword and it's current rank (if applicable)
 - a bulleted list of what you updated (5-10 points max)

Example:

CB - Jan 19/26, attachment based therapy, rank 16

- Answered the keyword intent in the first sentence
- CTA above the fold
- Mirrored H2/h3 structure
- keyword used in more heading
- FAQ Refinement

Part 2: In the client's slack channel

Post updated URL in the client Slack channel with the same list of the edits you made on the record

Example:

 **Carmen** 4:16 PM
Content refresh alert: <https://www.monimawellness.com/our-approach/attachment-based-therapy/>

Work done:

- Answer the keyword intent in the 1st sentence
- CTA above the fold
- Mirror H2/H3 structure from top SERP competitor
- Keyword used in more headings
- FAQ refinement to match Google Snippets for the keyword
- Refresh **SEO** title + metadescription [keyword was off]
- QA metadescription for best practices
- Confirmed RankMath score at 80+
- Confirmed inlinks at 20+
