

SOP: New Service Page Creation (SEO)

Purpose

Create new, research-backed service pages that align with search intent and existing site structure.

Scope

Applies to **net-new service pages** only.

Process

1. Page Setup

- Clone an existing **published service page** in WordPress
 - Locate the new draft (sort by *Date Last Modified* if needed)
-

2. Research & SERP Validation (Required)

- Review the **top 3 non-Wikipedia SERP results** for the service keyword
 - Use **Ahrefs Keyword Overview**
 - Identify:
 - Core subtopics competitors cover
 - Required trust elements (credentials, process, FAQs)
 - Research:
 - 1–2 authoritative external sources if relevant
 - Industry standards, guidelines, or definitions
 - No direct competitors
-

3. Rewrite for Target Service

- Copy the **entire cloned service page content** into the client's Claude project
 - Rewrite to target the new service keyword:
 - Maintain existing section structure
 - Update copy to reflect researched intent and terminology
 - Add links:
 - **External links** (only where they support credibility, 1-2 MAX)
 - **Internal links**
 - Include links to related services only
-

4. Build the Page in WordPress

- Paste revised copy into the page template
 - Add image(s) as needed
 - Use keyword-aligned alt text
 - Ensure:
 - Clean, keyword-only URL
 - SEO title and meta description are set
 - CTA exists above the fold
-

5. Before you hit publish

Confirm on the live page:

- CTA above the fold
- Logical heading structure
- Accurate, helpful content aligned with search intent
- Image alt text present and descriptive
- SEO title and meta description are correct

- All links resolve correctly

! Fix all issues before proceeding.

6. Internal Linking (Post-Publish)

- Add links **to the new service page** from at least **3 relevant existing blogs**
 - Use contextual, non-generic anchor text
-

7. Finalize & Log

- Post the live URL in the client Slack channel
- Return to Airtable and:
 - Update status to **Live**
 - Add **Published Date**
 - Remove due date
