

QBR Prep: SEO Planning Snapshot

Anchored Tides Recovery

Domain: anchoredtidesrecovery.com	Primary Location: Huntington Beach, CA
Program / Positioning: Women's Addiction Treatment & Dual Diagnosis	Analysis Window: Q1 2026 (through 2026-03-10)
Planning Quarter: Q2 2026	Generated On: 2026-03-10

ACCOUNT MANAGER CONTEXT
AM's Hypothesis: Given that I'm new to the account and have not had a chance to meet with anyone from Anchored Tides yet, my hypothesis should be taken with a grain of salt. I'll have better insights once I get into the day-to-day work and spend more time grinding through the data.
That said, Anchored Tides does not look like an account that needs a reset. It looks like an account where the right content direction is already taking shape, with recent modality-focused pages showing enough traction to suggest things are moving in the right direction, even if traffic and call pacing are sitting behind the initial goal.
Because I do not fully understand how those goals are being calculated yet, I'm hesitant to put too much weight on that gap and would chalk some of it up to automation not fully understanding the nuance.
For Q2, the priority should be to keep strengthening the women's modality and continuum-of-care cluster while tightening the admissions path, because based on our own framework, admits should matter more than traffic at a high level, and relevance should be improved before more volume is added.
Previous Quarter Assessment: From an SEO standpoint, Anchored Tides has one of the stronger content infrastructures in my client base. Even so, the account is still operating below its potential because of several factors, including a preventable technical issue at the root. My understanding is that this was tied to a solution that was not fully implemented in Q1.
The conversion scaffolding is in place, and it appears to have been strengthened in Q1 as well. Q1 search visibility looks softer in reporting than it should, but that seems to be driven more by a crawl issue than by any real content or strategy gap.
With only four credits per month, Q2 should be protective and structural before it becomes expansive.
Client Insights: None to date.
Client Sentiment: Concerned

1. What Matters Most This Quarter

GOAL TYPE	GOAL	SOURCE	GOAL SHIFT VS LAST QUARTER	REASON
Primary Goal/MVP NSM	160 organic + gmb + ai llm calls (Q target)	CallRail	0%	Last quarter goal: 160. Target: 160 organic + gmb + ai llm calls (0% vs last quarter) via CallRail. Actuals pending.
Secondary Goal	169 tracked calls (QTD)	CallRail	0%	169 organic calls tracked via CallRail this quarter. Calls are the primary measurable operational proxy for organic + gmb + ai llm calls.
Tertiary Goal/Secondary NSM	4,070 organic sessions	GA4	0%	Sessions Q target is 4,070. Actuals not yet available for this quarter.

2. Where Conversions Actually Happen

Top Converting Pages

TYPE	PAGE / PATTERN	CONVERSION SOURCE	NOTES / WHAT WE'RE LEARNING
No qualified data yet	No qualifying conversion page identified	GA4 / Call Tracking not detected	No GA4 conversion events or call-tracking landing-page data found. Connect GA4 event tracking or a call tracking provider to populate this table.

Top Conversion Patterns

PATTERN	WHY IT MATTERS	EVIDENCE
High-Intent Organic Traffic Capture	Treatment-intent organic queries (e.g., detox near me, rehab programs, insurance-covered treatment) represent the strongest mid-funnel intent. Pages ranking for these terms need optimized conversion paths to close the gap between clicks and contacts.	GA4 event tracking is not yet confirmed on key pages — connect GA4 or call tracking to qualify conversion-driving pages.
Tracking Gap as Conversion Floor	When conversion tracking is incomplete, high-value actions (form submits, call initiations, chat starts) go unattributed. This understates the true conversion rate and creates a systematic blind spot in reporting.	GA4 conversion events are not yet confirmed on key admissions-path pages — call tracking or GA4 setup is needed to qualify these pages.

Top Converting Sources

SOURCE	WHAT'S CONVERTING	NOTES / WHAT WE'RE LEARNING
NEW GMB CallRail	73 inbound calls (43% of all tracked calls)	Organic / direct channel — confirm with admissions team that these are admission-qualified calls
ATR Pool CallRail	38 inbound calls (22% of all tracked calls)	Organic / direct channel — confirm with admissions team that these are admission-qualified calls

Direct admit attribution remains partially inferred where tracking is incomplete, so some Section 2 conclusions are confidence-weighted rather than fully verified.

3. Top Organic Traffic Drivers

Top Traffic Topics

TOPIC	# QUERIES	QOQ QUERIES	IMPRESSIONS	QOQ IMPRESSIONS	EXAMPLE QUERIES	ADMITTS
Substance-Specific Education	81	+19.1%	8,732	+5.4%	do alcoholics drink every day can you be an alcoholic without drinking off does an alcoholic drink every day	Medium
Insight: 55% of clicks. Supporting traffic that assists conversion pathway.						
Other	45	-6.3%	15,453	-21.3%	is social media like a drug? high tolerance meaning anchor tides	Low
Insight: 11% of clicks. Low admit connection — mostly informational.

Top Traffic Pages

PAGE	CLICKS	QOQ CLICKS	IMPRESSIONS	QOQ IMPRESSIONS	# QUERIES	QOQ QUERIES	CTR	ADMITTS
/am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day/	871	-13.0%	45,225	+18.3%	35	+16.7%	1.9%	Medium
Insight: High-volume alcohol-awareness content. Entry-stage traffic that needs a clear route from educational content to detox or treatment program pages.								
/what-never-leaving-your-hometown-does-to-your-brain/	134	-19.8%	11,835	+35.9%	5	+150.0%	1.1%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to service pages are the highest-ROI improvement for this traffic.								
/female-musicians-beat-addiction/	107	-46.5%	8,636	+22.0%	2	+0.0%	1.2%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to service pages are the highest-ROI improvement for this traffic.								
/what-are-the-best-crystals-for-anxiety-and-stress/	99	-38.9%	28,173	-32.8%	7	-53.3%	0.4%	Medium
Insight: Condition-specific content attracting users researching symptoms or mental health concerns. Should route toward dual-diagnosis or appropriate treatment program pages.								
/what-is-the-fear-of-eating-in-front-of-others/	88	-34.8%	31,230	+5.3%	2	-33.3%	0.3%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to service pages are the highest-ROI improvement for this traffic.								
/	85	-24.1%	8,001	-37.9%	6	+50.0%	1.1%	Medium
Insight: Primary branded entry point serving a mix of direct, branded, and first-time visitors. Should route efficiently to service pages and the admissions path for maximum conversion.								
/how-drug-addiction-ruined-my-life/	66	-35.9%	3,881	-1.4%	2	+0.0%	1.7%	Medium
Insight: Moderate-volume substance-specific awareness content. Educational entry point that needs targeted internal links to appropriate service pages to convert traffic.								
/meet-the-team/	66	+57.1%	1,240	-10.7%	3	+0.0%	5.3%	Medium
Insight: Trust-building page that supports credibility evaluation. Late-stage visitors — internal links to admissions and program pages can convert this research intent.								
/understanding-the-duration-of-molly-in-your-urine/	34	-29.2%	24,764	-45.2%	3	+0.0%	0.1%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to service pages are the highest-ROI improvement for this traffic.								
/is-social-media-a-drug/	33	-76.1%	2,736	-29.1%	3	+0.0%	1.2%	Medium
Insight: Moderate-volume substance-specific awareness content. Educational entry point that needs targeted internal links to appropriate service pages to convert traffic.								

4. Site Service Overview

SERVICE	EXAMPLE PAGE
Contact / Admissions	/contact-us/
Detox	/womens-addiction-treatment-center/detoxification/
Residential / Inpatient	/treatment-for-co-occurring-disorders/
PHP / IOP	/php-vs-iop/
Outpatient	/outpatient-treatment/
Dual Diagnosis	/dual-diagnosis-and-treating-problems-at-the-root/
Therapies	/therapy-options/
Conditions	/mental-health-awareness-month/

5. SEO Tier Diagnosis

Tier 1 — Trust & Eligibility
Site is currently blocked at Tier 1 — Trust & Eligibility. High-intent service traffic does not land on clear primary URLs. 1605 pages missing titles — core pages may lack proper SEO fundamentals. Until core service pages are strong, clear, and properly indexed, higher-tier work will not produce meaningful results.

6. What We Need to Do Next

#	INITIATIVE	TIER	ACTION	REASON
1	Tracking & Attribution Setup Multi-source	Tier 1	Implement or verify GA4 and call-tracking instrumentation on key admissions-path pages — track contact form submits separately from Verify Insurance / VOB form submits, starting with Contact, Verify Insurance, and highest-intent service pages.	Reporting confidence is limited where conversion tracking is missing. Instrumentation must be in place before page-level admit connection can be quantified reliably.
2	Conversion Path Audit GA4	Tier 1	Audit and strengthen the path from organic landing pages to VOB/contact submission	Conversion path gaps compound slowly; fixing them now avoids a larger gap by end of quarter (lower confidence without GA4 data) AM focus area aligns: Given that I'm new to the account and have not had a chance to meet with anyone from Ancho.
3	Internal Linking — High-Traffic to Conversion GSC	Tier 1	Add internal links from high-traffic pages with low admit connection to primary service and VOB pages (e.g. /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day, /what-never-leaving-your-hometown-does-to-your-brain, /female-musicians-beat-addiction, /what-are-the-best-crystals-for-anxiety-and-stress, /what-is-the-fear-of-eating-in-front-of-others)	10 pages (led by /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day/, 871 clicks) carry organic traffic with limited path to admissions — targeted internal links to service and VOB pages are the lowest-cost lever to convert that existing traffic
4	Location Consolidation Multi-source	Tier 3	Retire overlapping near-me and legacy geo pages into the primary location architecture	Duplicate geo pages dilute authority and confuse Google about the primary service area
5	Indexability Audit Screaming Frog	Tier 3	Audit 294 non-indexable pages — identify any service, location, or content pages accidentally excluded from Google's index and remove incorrect noindex tags	Non-indexable pages cannot rank regardless of content quality. A single service page accidentally noindexed represents zero organic traffic potential

7. How Credits Are Used Each Month

Credits	Activity
2 Credits	"Women's Residential Treatment vs. PHP vs. IOP: Which Level of Care Is Right for You?" Why: This is a classic care-access support piece that addresses a real decision point for women entering treatment. It clusters naturally around all three of their core program pages (detox, residential, admissions) and typically captures people who are comparison-researching before committing. It also tends to pull in traffic from family members searching on behalf of a loved one.
1 Credit	Refresh "Informational / Education" content to strengthen admissions connection
1 Credit	Update /what-never-leaving-your-hometown-does-to-your-bra page content to improve conversion intent alignment

May 2026

Credits	Activity
1 Credit	Update /female-musicians-beat-addiction page content to improve conversion intent alignment
2 Credits	"Women's Detox in Orange County: What to Expect in the First 72 Hours" Why: Detox is their primary money page and the highest-intent entry point. Most women researching detox are doing so in a moment of acute decision-making. A direct, clinical but compassionate article targeting "women's detox Orange County" and "detox for women near me" captures bottom-funnel query volume that a service page alone can't reach. Links directly to /programs/detox.
1 Credit	Refresh one service page to improve conversion intent alignment

June 2026

Credits	Activity
2 Credits	"Does Insurance Cover Women's Rehab in California? (A Guide to Verifying Benefits)" Why: Insurance verification is one of their lead events and /insurance is a money page. "Does insurance cover rehab" and "verify insurance rehab" are consistently high-volume, high-intent queries. A standalone article lets them rank for the question-based search while the service page handles the conversion. California-specific framing strengthens local relevance.
1 Credit	Refresh one underperforming money page with updated admissions messaging
1 Credit	Create one FAQ-style support content piece around treatment access

8. What We Track

FOCUS AREA	METRIC	SOURCE	WHY IT MATTERS
Admissions Conversions	Verify Insurance / VOB form submits + contact form submits + qualified organic calls	GA4 / Call Tracking	Directly measures admission-driving actions from organic traffic
Conversion Rate	Organic conversion rate on top landing pages	GA4	Higher CVR on existing traffic is the most capital-efficient growth lever
Internal Link Effectiveness	Click-through from informational pages to service/VOB pages	GA4	Measures whether internal linking strategy converts existing traffic to admissions pages
Local Visibility	GBP calls + direction requests + local organic sessions	GBP GA4	Validates that location consolidation improves local conversion signals
Organic Sessions	Total organic sessions (QoQ)	GA4	Primary volume indicator for organic channel health
Qualified Calls	Organic phone calls (answered, 60s+)	CallRail	Strongest proxy for admits when direct admit tracking is unavailable

9. Additional Opportunities

UPSELL Custom Authority-Building Initiative
Service-page rankings on high-value treatment terms are constrained by domain authority. The standard content roadmap addresses what to publish, not the ceiling that prevents those pages from ranking.
EVIDENCE Tier 1 site diagnosis (Trust & Eligibility) — domain authority is the primary constraint on service-page rankings, which content production alone cannot break through 1 confirmed high-intent topic cluster identified — authority, not content volume, is the primary ranking constraint on these terms
RECOMMENDATION A focused link acquisition or digital PR program targeting high-intent service pages. This is a deeper SEO investment than the standard monthly retainer covers, designed to remove the authority ceiling that content production alone cannot lift.
Recommended when authority — not content output or keyword strategy — is the confirmed bottleneck. Link acquisition and digital PR address a constraint that standard scope cannot resolve.
