QUARTERLY BUSINESS REVIEW

Q4 2025 Review & Strategic Roadmap

The Grove Recovery Center

Produced By: Account Manager Name

Date: 11/11/2025

Agenda

● 01

Performance Review

A transparent look at last quarter's results, funnel movement, and NSM alignment.

● 02

Strategy Overview

The external factors shaping performance and where the market is heading.

● 03

Strategic Plan

Data-backed initiatives designed to accelerate next-quarter performance.

● 04

Roadmap & Alignment

A clear path forward with prioritized actions, timelines, and ownership.

● 05

Partnership Items

Strengthening our partnership through shared goals, referrals, and collaboration.

● 01

Performance Review

Key data and insights from Q3

● 02

Strategy Overview

Factors shaping performance

● 03

Strategic Plan

Initiatives that drive next quarter's outcomes

● 04

Roadmap & Alignment

Our 12-month approach to drive center growth

● 05

Partnership Items

Strengthening our partnership

Win-Win Referral Program

Know another rehab center or business that could use help growing their admissions?

Refer them to us - and when they become a client, you both win. They get expert marketing support, and you get a service credit as a thank-you. Helping others grow helps you grow too!

If there is anyone in your network you think could benefit from our Paid Media, Content, and SEO services, please let us know.

Thank you for your continued partnership.

Every partnership helps us move closer to our goal of connecting **30,000 people** with treatment by 2030.

Thank you for sharing the same purpose and commitment to meaningful results.

Quarterly Performance Overview

Q3 performance compared to Q2 benchmarks

Leads

3,245

vs. Q2: 2,780

▲ 16.7% Increase

VOBs

682

vs. Q2: 594

▲ 14.8% Increase

Viable VOBs

315

vs. Q2: 261

▲ 20.7% Increase

Admits

31

vs. Q2: 34

▲ 10.7% Decrease

Why They Changed:

● 01

Optimization of targeting toward PPO-dense regions shifted viability and admit patterns.

● 02

Bid strategy and keyword refinements influenced both cost efficiency and lead quality.

● 03

Seasonal fluctuations in treatment-seeking behavior impacted overall call and VOB volume.

NSM Overview

KPI	Q2	Q3	Delta Δ
Leads (Calls)	3245	3480	+7.2%
VOBs	682	721	+5.7%
Viable VOBs	315	304	-3.5%
Admits	31	28	-9.7%

● Increased Lead & VOB Volume

Higher search activity for OON residential substance abuse terms in key states lifted overall top-of-funnel volume despite stable budgets.

● Lower Admit Conversion

A mix of seasonal slowdown and higher deductible plans led to fewer viables → admits compared to Q2.

KPI Trend Overview

Showing quarter-over-quarter movement across Leads

7

Efficiency Comparison

Viable Rate (% of VOBs)

42.9%

Paid Search

37.5%

Paid Social

Cost Efficiency Winner

Paid Social delivers lower cost per viable

(\$1,567 vs \$1,903) and cost per admit (\$6,043 vs \$9,900)

Volume Leader

Paid Search drives 2.7x more leads and

2.9x more viable VOBs than Paid Social

● 01

Paid Social produced lower cost per viable due to lower CPMs and strong creative relevance.

● 02

Paid Search drove higher-intent calls and delivered double the admits despite higher costs.

● 03

A blended channel approach continues to provide both scale and cost efficiency.

Campaign Performance Comparison

Top Campaign Groups (Q3)

Insurance PPO Addiction Treatment Near Me

Volume Comparison

Cost Efficiency Comparison

Insurance PPO Campaign

Spend	Cost/Viable
\$64,200	\$1,259
Cost/Admit	Viable Rate
\$5,836	50.0%

Addiction Treatment Near Me

Spend	Cost/Viable
\$82,700	\$2,297
Cost/Admit	Viable Rate
\$11,814	40.4%

● Cost Efficiency Winner: Insurance PPO

Delivers 50% lower cost per admit (\$5,836 vs \$11,814) and 45% lower cost per viable (\$1,259 vs \$2,297). Higher viable rate at 50.0% vs 40.4%.

● Volume Leader: Addiction Treatment Near Me

Generates 24% more leads (510 vs 410) but at higher spend (\$82,700 vs \$64,200).

● Recommendation

Scale Insurance PPO for superior ROI and efficiency.

● Paid Media

Cost per Stage Breakdown

Cost efficiencies improved across every stage due to better targeting in PPO-dense regions, reduced spend on non-performing geographies, and consolidation of keyword groups. Despite only a moderate increase in front-end volume, the improved viability rates drove down cost per viable and cost per admit.

Cost Per Stage Breakdown

Quarter Comparison: Q2 → Q3

■ Q2 2025

■ Q3 2025

Overall Efficiency: All cost-per-stage metrics improved from Q2 to Q3, with Admits showing the largest decrease of 21.3% (\$19,675 → \$15,488), while volume increased across all stages.

● Paid Media

Viabiles + CPV Trend Snapshot

Despite a reduction in viables quarter over quarter, efficiency increased meaningfully. Strategic bid adjustments and tightened geo targeting lowered CPViable by seventeen percent, reversing the upward trend seen in Q2. The team prioritized quality over volume, resulting in more cost-effective delivery while maintaining viability thresholds.

Market Insights - SEO

AI Overviews Are Reshaping How Patients Search

More than half of healthcare searches now surface AI-generated summaries, reducing opportunities for traditional organic clicks. Visibility inside AIO summaries is becoming as critical as ranking on page one.

- *AIOs appear in $\approx 51\%$ of healthcare queries*
- *Organic CTR drops by 30–40% when an AIO is present*

AI Overviews in Healthcare Queries

2025 Analysis of Search Results

■ Queries with AI Overviews (51%) ■ Traditional search results (49%)

With AI Overviews

51%

Show AIO results

Traditional Results

49%

Standard SERP only

Healthcare Impact

High

Majority affected

Key Finding:

More than half of healthcare-related searches now display AI-generated overviews, significantly changing how patients and providers find medical information.

Local intent drives the majority of treatment-center search activity.

14.2%

of organic admits begin with a **local, proximity-based search** (“rehab near me,” “detox in Orange County,” etc.)

- *Facilities with fully optimized local SEO profiles (GMB + NAP consistency + localized content) see a 2.4× higher conversion rate from organic than those without.*

Source: 2025 Industry Benchmarks

Local visibility is now the strongest organic driver for treatment centers. *Winning locally equals winning admissions.*

Content depth drives visibility in high intent searches

- *Pages exceeding 1,000 words see a 52% increase in page-one rankings for rehab related keywords.*
- *Adding structured data + medical E-E-A-T elements increased rich result eligibility by 28%*
- *Treatment centers publishing 2+ long form guides per month see 41% faster keyword growth QoQ.*

Source: 2025 Industry Benchmarks

Depth matters. Centers offering real patient-educated content grow traffic and grow their viable call volume faster.

Market Insights - SEO

AI Overviews Are Reshaping Recovery Search Behavior

Google's early rollout of AI-generated summaries is changing how patients discover treatment options.

INSIGHTS

- AI Overviews now appear across many treatment-related searches such as “***residential rehab near me,***” “***out-of-network treatment options,***” and “***IOP mental health programs.***”
- Sites with comprehensive service content, strong local SEO signals, and clear insurance information tend to be referenced more frequently.
- This shift emphasizes the need for content clarity, local authority, and structured metadata to ensure visibility.

The Challenge

Examples for the challenge.

● The Challenge

Why we aren't appearing in AI overviews

Current content depth and update frequency limit AI Overview eligibility.

Confidential Recovery isn't appearing in AI Overviews because priority service pages don't yet have the depth, structure, and topical authority signals Google selects for these summaries.

- **Content credits are spread thin**, limiting our ability to produce the long-form Signature Content AI Overviews favor.
- **Core service pages lack deeper topical expansion** and structured FAQs Google pulls from.
- **Competitors have been publishing content more frequently**, reinforcing them as trusted sources.

Residential Treatment Program in San Diego

Confidential Recovery offers residential treatment for adults looking to overcome addiction in a supportive environment.

Call Today: (555) 123-4567

About Our Program

Confidential Recovery provides clients with structure, support, and guidance throughout their stay. Our team is here to help you take the next step toward recovery.

What We Treat

- Alcohol Addiction
- Drug Addiction
- Mental Health Challenges

Our Approach

We use evidence based practices to support clients in meeting their goals.

Why Choose Confidential Recovery?

Confidential Recovery is committed to helping individuals start their recovery journey with compassion and care.

Challenges

- Too thin to qualify for AI Overview inclusion.
- Missing the content depth competitors have.
- Insufficient structured information for AI summarization.

Paid Media Challenge

Budget Allocation Misalignment Is Limiting Performance

Your team asked to increase Facebook spend this quarter. However, the data shows that Facebook is one of the least efficient acquisition channels for viable VOBS and admits in this market.

Google Search continues to outperform Facebook by a wide margin in both cost per viable and cost per admit, yet it remains underfunded relative to its return.

Channel Efficiency Comparison — Q2

Performance metrics across paid acquisition channels

Most Efficient (CPA)

Google Search - Branded

\$11,500 per admit

TOTALS	\$114,000	25	\$4,560	6	\$19,000

● *The Challenge*

Declining Funnel Viability Is Limiting Admit Growth

Lower VOB-to-Viable rates reduce qualified admission opportunities.

Although lead and VOB volume stayed consistent, fewer VOBs converted into Viable VOBs this quarter. This drop in funnel viability limits how many qualified patients reach admissions and creates volatility in Cost per Admit. PMAX contributes volume, but with weaker viable output than Search, further constraining late-funnel performance.

Q2 → Q3 Data Spotlight

Viable VOBs

-13% QoQ

- Admits grew **+22%** but from fewer viable opportunities
- PMAX viability often below **20-25%** vs Search at **30-40%**

- **Lower VOB → Viable VOB conversion reduces admit-ready opportunities**
- **Higher cost per viable increases CPA sensitivity**
- Search delivers **stronger viability**; PMAX underperforms in quality

Competitive Snapshot

Examples of the competitive snapshot.

Competitive Snapshot

WHAT

- The data indicates that our competitor currently ranks for around 120 keywords with a visibility score significantly higher than our roughly 110 keywords and lower score.
- Capturing even a portion of that search share could boost our visibility by 10–12 points, potentially attracting thousands more visitors each month. This increase in traffic would improve our site's rankings AND strengthen our overall brand authority in the digital space.

San Diego Detox

Coastal Detox

Source: SEMRush

● Competitive Snapshot

Who's Winning AI Overview Visibility

WHAT

- AI-generated summaries now highlight facilities like Make Believe Recovery, Fake Mental Health Center, and Rehabs R Us for recovery searches.
- Your competitors are receiving disproportionate visibility and early click-share — even when they do not rank first organically.

Key Insight

Without showing up in these summaries, Confidential Recovery is missing high-intent opportunities now being redirected to competing facilities.

Your Current Monthly Budget Is Limiting Your Ability to Compete in This Market

Similar providers investing more in paid media are able to reduce their acquisition costs and generate higher-quality opportunities across the full funnel.

Monthly Spend	Leads	VOBs	Viable VOBs	Admits	Cost Per Admit
\$40,000	320	95	22	3	\$18,400
\$70,000	863	226	46	7	\$16,100
\$100,000	1154	365	74	12	\$14,600

Opportunity

Examples for the opportunity.

SEO Opportunity

Your competitor averages 21.5k monthly visits from organic users and ranks for ~2.6k organic keywords.

Your center's organic traffic and non-branded keyword rankings currently trail behind key competitors, highlighting a clear opportunity to increase market share.

Given the gender-specific and niche focus within the addiction treatment space, there's strong potential to leverage highly targeted strategies for more effective audience reach.

Source: SEMRush

Source: SEMRush

The Opportunity

With new generative AI search behaviors, we have opportunities to show up in other ways in addition to SERPS, such as, AI Overviews, images, People Also Ask, short videos, etc.

● Paid Media Opportunity

Prioritizing the better performing landing page.

Our A/B Test showed that the new landing page is consistently outperforming the previous version across every conversion metric — indicating that shifting more budget to this experience will increase viable VOBs and lower cost per admit.

Old Landing Page

Conversion Rate: 6.2%
Cost per VOB: \$575
Cost per Viable VOB: \$1,420
Bounce Rate: 64%
Avg. Time on Page: 38 seconds

New Landing Page

Conversion Rate: 12.8%
Cost per VOB: \$338
Cost per Viable VOB: \$940
Bounce Rate: 38%
Avg. Time on Page: 1:12 seconds

Opportunity

Shift Current Content Credits for AI Overviews

We recommend re-allocating content credits toward deeper, more authoritative content that aligns with AI Overview requirements.

KEY POINTS

- **Foundational SEO is in place:** baseline rankings, technical improvements, and early keyword movement are now established.
- **AI Overviews demand depth, freshness, and structured expertise** — reallocating credits lets us strengthen core service pages without increasing spend.

Current Credit Allocation

	Signature Content (x1)	2 Credits
	Service Content (x1)	2 Credits
	Scale Content (x1)	1 Credit
	Content Updates	0 Credits

Total: 5 Credits

Recommended Reallocation

	Signature Content (x1)	2 Credits
	Service Content	0 Credits
	Scale Content	0 Credit
	Content Updates (x6)	3 Credits

Total: 5 Credits

(No Additional Investment)

Grow Faster

	Signature Content (x1)	2 Credits
	Service Content (x1)	2 Credits
	Scale Content (x1)	1 Credit
	Content Updates (x6)	3 Credits

Total: 8 Credits

(Additional Investment)

Opportunity

Shift Budget Toward High-Performing Search

Reallocating spend strengthens viable VOB quality and improves admit consistency.

INSIGHTS

- Current spend is weighted heavily toward PMAX, which delivers inexpensive VOBs but lower viable output.
- By shifting 15–20% of that budget into high-performing Search campaigns, *without increasing total spend*, we can expand qualified opportunities and improve Cost per Admit stability.

Current Quarterly Budget Allocation (Q4)

Search – Webserv Rehab (Primary)	\$160,000 (40%)
PMAX – Rehab White	\$120,000 (30%)
PMAX – Detox White	\$60,000 (15%)
Branded Search	\$25,000 (6%)
Remarketing (Display/YouTube)	\$20,000 (5%)
Other Search Segments	\$15,000 (4%)

TOTAL: \$400,000 (100%)

Proposed Optimized Budget Allocation

Search – Webserv Rehab (Primary)	\$220,000 (55%) ▲
PMAX – Rehab White (Refined)	\$80,000 (20%) ▼
PMAX – Detox White (Refined)	\$40,000 (10%) ▼
Branded Search	\$25,000 (6%)
Remarketing (Display/YouTube)	\$20,000 (5%)
Other Search Segments	\$15,000 (4%)

TOTAL: \$400,000 (100%)

Data-Backed Path to 36 Quarterly Admissions

Our NSM model shows exactly what it will take to hit your quarterly admit target.

Using your Q4 performance data and real funnel conversion rates, we built a forward-looking admissions model for Q1. With a quarterly budget of \$400,000, the required Cost per Admit is \$11,111.

Goal Type: Admissions

Admissions Goal: 36

Quarterly Budget: \$400,000

Cost Per Admit Needed: \$11,111

Q4 Performance Data

Target CTR & CVR

Ad Click-through Rate: 6%

Landing Page Conv. Rate: 9%

Conversion Rates

Lead → VOB: 16%

VOB → Viable: 30%

Viable → Admit: 40%

Projections

Metric	Goal	Cost-Per
Leads	1,875	\$213
VOBs	300	\$1,333
Viabiles	90	\$4,444
Admissions	36	\$11,111

● Goals

Paid Media NSM (North Star Metric)

Paid Media Q3 NSM

80 Approved VOBs

- This is based on the scenario laid out in the next slide

Goal Setting

Goal Type: Viables	
Viables Goal	80.00
Period Budget	\$585,000
Cost-per-Viable Needed	\$7,313

Projections

	Goal	Cost-per
Leads	773	\$757
VOBs	174	\$3,362
Viables	80	\$7,313
Admissions	31	\$18,871

LTV:CAC Ratio	1.06
Est. Revenue	\$620,000
Net Return	\$35,000

Reality Check

1. Start off with entering the Target CTR and CVR.

Ex. I expect my ads will have a X% CTR and my LP to have a X% CVR.

Ad Click-through Rate:	6%	What is your target CTR?
Landing Page Conv. Rate:	9%	What is your target LP CVR?

2. Compare the Impr. and Clicks needed with the platform estimates.

Ex. I need 100k impr, but LinkedIn is forecasting only 50K with my audience size.

Ex. I need 30k clicks, but Google Ads is forecasting only 10K with my search volume.

Impressions Needed:	143,307	Is my TAM large enough for this?
Clicks Needed:	8,885	Is my audience/keyword volume big enough?
Cost per Click Needed:	\$65.84	Is this realistic based on my channel mix?

● Goals

● Goals

Content & SEO Q3 NSM

95k Sessions

6,650 First-Time Calls

Based on current performance trends (avg. 29,405 sessions/month, 3.55% call conversion rate), we're projecting:

- **Traffic growth acceleration** - 25% QoQ increase in total sessions driven by expanded content strategy.
- **Local search optimization** - Birdeye listing management, GBP enhancement, and surrounding cities content will capture additional local traffic.
- **Conversion rate recovery** - Local SEO implementation and CRO improvements are expected to restore conversion rates from 3.55% to 7%.

6-Month Predictions: CRO vs No CRO (Jul - Dec 2025)

Lorem Ipsum

These results are conditional to keeping your monthly seo spend at \$7,000 per month. Increasing or decreasing spend will result in slightly different results.

Tactics

Examples for tactics.

SEO Q4 Tactics

Enhanced content production and technical optimization

We'll leverage increased content capacity and multi-site strategy to capture high-intent local searchers and convert them into scheduled appointments.

1

Content Production Scaling - Utilize 12 monthly content credits strategically across PLH and CBHC to target surrounding cities/counties while maintaining national reach.

2

Location Page Optimization + Geographic Expansion - Optimize existing clinic pages and create complementary content for surrounding areas using flexible content allocation.

3

Google Business Profile Enhancement - Leverage content creation and digital PR strategy to enhance Q&A sections and product listings while building local authority through community engagement.

4

Technical SEO + User Experience Optimization - Implement comprehensive technical audits and website architecture improvements to restore 3.55% conversion rate toward 7% baseline.

5

Multi-Site Content Strategy - Deploy strategic content allocation between Porch Light Health and Comprehensive Behavioral Health Care to maximize market penetration.

Enhancing Lead Quality

WHAT

- Maintain efficient CPA performance (~\$12.8K) while improving lead quality (longer-stay admits) and setting the stage to scale once budget allows.

HOW

- Refocus on Local Targeting
Return to targeting local geos that previously drove longer-stay admits. Local clients are more likely to show up and stay longer, improving downstream value from each admit.
- Relaunch PMAx with MyDrugRehab Campaign
Build and launch the new MyDrugRehab landing page and pair it with refreshed PMAx creative. Re-test with a slightly increased budget to validate PMAx as a scalable channel.
- Run Targeted A/B Tests
Test new headlines and descriptions in search ads to improve CTR and lead quality. Explore GMB ads and location targeting variations to boost local lead engagement.
- Align Budget Increases with NSM Shift
Keep NSM at 12 VOBs/mo with current budget. If performance allows and budget increases, shift NSM to focus on viables to drive higher-quality leads and admits.

Expand High-Intent Audiences

WHAT

- Introducing stacked audience layers (in-market + custom intent + CRM lookalikes) to increase reach to users actively researching treatment options.

WHY

- High-intent segments convert at a lower Cost Per Viable because they're closer to making a decision — especially in OON residential markets.

High-Intent Targeting Impact

Comparison of standard vs. layered targeting strategies

Standard Interest Targeting CPA

\$15.2K

Baseline performance

Layered High-Intent Targeting CPA

\$11.9K

▼ 22% improvement

Viable VOB Rate Improvement

31% → 42%

▲ 35% relative increase

Cost Per Acquisition Comparison

Standard Interest Targeting

\$15,200 CPA

Layered High-Intent Targeting

\$11,900 CPA

▼ **\$3,300 savings (22%)**

Expected Impact

Higher-quality clicks, more viable VOBs, and stronger admission potential from users actively comparing treatment centers.

Service Upsells

Templates for service upsells.

Scale Your Facility

Optimize Your Admissions Process to Increase Revenue

Every missed VOB and dropped lead is lost revenue. Admission Ops fixes the gaps so more opportunities become admits.

BENEFITS

- **Recover revenue** lost to slow verification, missed follow-ups, and inconsistent workflows.
- **Increase admit conversion** by accelerating VOB processing and tightening intake performance.
- **Eliminate lead leakage** with standardized workflows.

Always On Admissions

Providing ongoing reporting, insights, and optimization on your entire admissions process.

Team Enablement & Training

Equipping your team with the right tools, scripts, and processes to convert more leads quickly.

CRM & Workflow Optimization

Building a custom CRM foundation and workflow that aligns marketing and admissions

VOB & Insurance Operations

Streamlining the insurance verification process to cut verification delays and remove bottlenecks.

Lead Intake & Tracking

Capturing, scoring, and accurately attributing every lead that enters your pipeline.

Grow Your Facility

Scale Your Campaigns With Predictable, High-Intent Growth

Unlock stronger efficiency and higher-value admits with smarter budget allocation and optimized campaign performance.

BENEFITS

- **Lower Cost Per Admit** by reallocating budget toward proven high-intent channels.
- **Increase Viable VOB Volume** with optimized campaign structures and refined audiences
- **Scale Patient Acquisition Predictably**

Paid Search (SEM)

Drive qualified calls by aligning campaigns with search intent.

Paid Social (PPC)

Capture attention and build awareness and generate inbound demand.

Landing Pages

Create engaging experiences while eliminating conversion leaks.

Conversion Rate Optimization

Ensure every paid click maximizes the chance of an admission.

Grow Your Facility

Turn Organic Search Into a Long-Term Admissions Engine

Increase high-intent visibility and organic conversions with a stronger technical foundation and scalable content strategy.

BENEFITS

- **Grow High-Intent Organic Traffic** by strengthening rankings across conditions, levels of care, and location-based searches.
- **Increase Local Map-Pack Visibility** so nearby patients find your facility first, not competitors.
- **Build a Scalable Content Engine** that improves authority and reduces dependency on paid channels.

Local & Proximity SEO

Securing top visibility for high-intent, location-based searches.

Search Engine Optimization

Ensuring your site is technically sound and perfectly aligned with patient intent.

Authority Content Engine

Creating high-value, compliant content that converts traffic and builds trust.

AI-Driven Performance

Leveraging advanced tools and AI for strategy, link building, and growth.

● **Paid Media Roadmap**

Goal	Quarter 1 Strengthen the Funnel	Quarter 2 Deepen Intent & Improve Viability	Quarter 3 Scale High-Fit Volume	Quarter 4 Accelerate Admit Growth
	Q1 Initiatives	Q2 Initiatives	Q3 Initiatives	Q4 Initiatives
Channel Initiatives	Redirect budget toward high-performing campaigns with stronger Viable → Admit rates.	Expand insurance and residential-specific campaigns to increase qualified VOB flow.	Add new geo-expansion campaigns focused on nearby high-value markets.	Expand winning campaign structures with additional budgets allocated to best-fit traffic sources.
	Reduce wasted spend by tightening geographic, audience, and negative keyword filters.	Launch structured A/B testing for ad headlines, descriptions, and call-extensions.	Introduce additional upper- and mid-funnel creative (YouTube / Demand Gen) to support assisted conversions.	Implement full-funnel creative refresh ahead of seasonal recovery peaks.
	Refresh landing page messaging and insurance CTAs to improve VOB-ready conversions.	Improve landing page conversion rate with streamlined form flow and clearer benefits.	Strengthen insurance-focused funnel paths with tailored copy and segmented ad groups.	Add deeper audience layering using search intent, first-party data, and eligibility patterns.
	Audit all conversion tracking to ensure accurate viability and admit measurement.	Optimize audience segments to prioritize users with demonstrated treatment-seeking intent.	Deploy automated rules to increase spend during historically high-intent hours and days.	Run end-of-year funnel diagnostics to identify remaining friction points impacting Cost per Admit.
	Stabilize CPL and CPVOB through targeted bidding adjustments.	Enhance remarketing to recapture leads who showed mid-funnel intent but did not inquire.	Build new ad variations informed by Q1–Q2 conversion insights.	Finalize next-year NSM plan using full-year admit, viability, and cost-efficiency learning.
Ongoing	Ad creative optimization • Bidding strategy refinement • Negative keyword governance			
	Weekly pacing + budget control • Funnel diagnostics • Conversion rate optimization • Cross-channel reporting			

● **Content & SEO Roadmap**

Goal	Quarter 1 Restructure	Quarter 2 Optimize	Quarter 3 Expand	Quarter 4 Scale
	Q1 Initiatives	Q2 Initiatives	Q3 Initiatives	Q4 Initiatives
Channel Initiatives	Complete full technical SEO audit and implement priority fixes. Refresh all thin or underdeveloped service pages Conduct full keyword research + build a 12-month content roadmap. Identify gaps preventing AI Overview eligibility (E-E-A-T + topical coverage). Audit GBP + local listings to benchmark current local search performance.	Expand high-value pages with deeper content to align with AI Overview structure. Publish targeted supporting articles and FAQs to build topical authority. Implement content updates and CRO improvements on key service pages. Launch location-focused content to improve local call volume. Optimize internal linking across core recovery topics.	Build new content clusters to capture broader recovery-related searches. Enhance E-E-A-T signals (expert quotes, credentials, sourcing, schema). Refresh top-performing pages to protect rankings and drive additional Calls/VOBs. Expand local SEO footprint with surrounding city + neighborhood pages. Optimize pages for emerging AI Overview patterns as they continue to evolve.	Scale content output using updated credit allocation (more content updates). Publish advanced authority content to differentiate CR from similar facilities. Launch a year-end optimization sweep across all revenue-driving pages. Expand local authority with community-focused content and enhanced GBP presence. Evaluate year-end NSM progress and build the next-year strategy.

Next Steps

● 01

Define Updated Paid Media Budget

Refine monthly investment levels to align with performance goals and competitive benchmarks.

● 02

Adjust Content Credit Package

Increase credits for condition, program, and local content to strengthen organic visibility across priority service lines.

● 03

Activate Local SEO Enhancements

Optimize GMB, proximity signals, and location pages to capture more map-driven calls.

● 04

Implement AdmissionOps Workflow Updates

Tighten routing, verification, and reporting workflows to reduce drop-offs and accelerate admit velocity.

● 05

Review Additional Service Opportunities

Evaluate SEO expansion, CRO, and AdmissionOps add-ons that support long-term patient acquisition predictability.
