

Anchored Tides Recovery

Domain: anchoredtidesrecovery.com	Primary Location: Huntington Beach, CA
Program / Positioning: Addiction Treatment	Analysis Window: Q1 2026 (through 2026-03-12)
Planning Quarter: Q2 2026	Generated On: 2026-03-12

ACCOUNT MANAGER CONTEXT
AM's Hypothesis: Anchored Tides appears to be headed in the right content direction, with modality-focused pages showing enough traction to support the claim. For Q2, the priority should be to keep strengthening the women's continuum-of-care cluster while tightening the admissions path, with more weight placed on relevance and admits than on raw traffic alone. There is an issue with the blog displaying currently (Trevor cited Elementor errors as the cause) and that will have to be solved.
Previous Quarter Assessment: Anchored Tides has a strong content foundation, but the account is still operating below potential in part because the homepage was set to noindex, which likely limited visibility and authority flow in Q1. The conversion scaffolding appears to be in place, and with only four credits per month, Q2 should stay protective and structural before becoming expansive.
Client Sentiment: Neutral

1. What Matters Most This Quarter

GOAL TYPE	GOAL	GOAL SHIFT VS LAST QUARTER	REASON
Primary Goal/MVP NSM CallRail	160 organic + gmb + ai llm calls	-14%	Last quarter goal: 187 organic + gmb + ai llm calls. Last quarter actual: 102 (64.5% of goal). Performance fell short of target by 85 organic + gmb + ai llm calls (45%). Available evidence points to a likely crawl or indexation issue that suppressed organic visibility during the prior quarter, limiting inbound demand before it reached the conversion stage. As a result, the current-quarter goal is being reduced to 160 organic + gmb + ai llm calls tracked via CallRail while structural and conversion-path improvements are implemented.
Secondary Goal/NSM GA4	4,070 organic sessions	-16%	Last quarter goal: 4,854 organic sessions. Last quarter actual: 2,781 (57.3% of goal). Performance fell short of target by 2,073 sessions (43%). Available evidence points to a likely mix of crawl constraints and content maturity gaps that held organic sessions below target — pages are indexed but not yet ranking with enough visibility to drive their full traffic potential. As a result, the current-quarter sessions goal is being reduced to 4,070 while crawl quality and content depth improvements are prioritized. Traffic is led by "Substance-Specific Education", "Other", "Informational / Education" topics (9% of clicks from "Substance-Specific Education"). Top page: /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not. Notable delta: what-ever-leaving-your-hometown-does-to-your-brain down 20% QoQ.

2. Where Conversions Actually Happen

Top Converting Pages		
TYPE	PAGE	NOTES / WHAT WE'RE LEARNING
Contact / Admissions	/contact-us	High-confidence inference: Contact and admissions pages are near-certain conversion-support URLs for treatment centers — they are the primary destination for users actively seeking intake information.
Verify Insurance	/admissions-and-alcohol-rehab-insurance	High-confidence inference: Admissions pages sit at the bottom of the conversion funnel — users reaching this page have moved past evaluation and are initiating the intake process.

PATTERN	WHY IT MATTERS	EVIDENCE
High-intent Organic Traffic Capture	Treatment-intent organic queries — detox near me, rehab programs, insurance-covered treatment — represent the strongest mid-funnel intent. Pages ranking for these terms need optimized conversion paths to close the gap between clicks and contacts.	Directional inference: Treatment-intent organic traffic is likely the strongest conversion-support pattern in this account because these queries sit closest to admission decision-making — however, page-level GA4 conversion verification is incomplete, so the full conversion contribution of this traffic remains inferred rather than confirmed.
Tracking Gap as Conversion Floor	When conversion tracking is incomplete, high-value actions (form submits, call initiations, chat starts) go unattributed. This understates the true conversion rate and creates a systematic blind spot in reporting.	Moderate-confidence inference: Tracking gaps appear to be suppressing visibility into true conversion behaviour — high-intent entry patterns are present but page-level event confirmation is incomplete, which means the reported conversion floor is likely understating actual admissions-intent activity.

SOURCE	WHAT'S CONVERTING	NOTES / WHAT WE'RE LEARNING
NEW GMB CallRail	74 inbound calls (43% of all tracked calls)	This source is generating a disproportionately large share of tracked call activity at 43% — a concentration that suggests this channel is the primary driver of phone-based leads and should be treated as a protection priority rather than a passive background source.
ATR Pool CallRail	39 inbound calls (23% of all tracked calls)	This source is contributing a meaningful secondary share of tracked calls at 23% — a level that indicates it plays a consistent assist role in total call volume, so any deterioration here would likely weaken overall call performance even if the dominant source remains stable.

3. Top Organic Traffic Drivers

TOPIC	# QUERIES	QOQ QUERIES	TOTAL IMP.	QOQ IMP.	EXAMPLE QUERIES	ADMITTS
Substance-Specific Education	82	+20.6%	8,921	+4.5%	do alcoholics drink every day can you be an alcoholic without drinking off does an alcoholic drink every day	Medium
Insight: 55% of clicks. Supporting traffic that assists conversion pathway.						
Other	45	-6.3%	15,868	-25.8%	is social media like a drug? high tolerance meaning anchored tides	Low
Insight: 11% of clicks. Low admit connection — mostly informational.						
Informational / Education	39	+11.4%	75,362	+994.4%	people who never leave their hometown self forgiveness in recovery how long does molly stay in system	Low
Insight: 11% of clicks. Low admit connection — mostly informational.						
Mental Health / Conditions	13	-67.5%	2,518	-59.7%	best crystal for anxiety and panic attacks crystals for anxiety and panic attacks hometown anxiety	Medium
Insight: 3% of clicks. Supporting traffic that assists conversion pathway.						
Detox	9	+800.0%	347	+767.5%	alcohol withdrawal symptoms activated charcoal for the detox alcohol withdrawal	High
Insight: 2% of clicks. High-intent service traffic — directly tied to admissions.

Insight: 15% of clicks are branded — healthy brand presence						
Women's Rehab	3	+200.0%	223	+17.4%	drug addict female singer famous women in recovery most common female mental disorders	Medium
Insight: 1% of clicks. Supporting traffic that assists conversion pathway.						
Therapies	2	-33.3%	124	+36.3%	12 step narcotics anonymous 12 steps of na	Medium
Insight: 0% of clicks. Supporting traffic that assists conversion pathway.						

PAGE	CLICKS	QOQ CLICKS	TOTAL IMP.	QOQ IMP.	# QUERIES	QOQ QUERIES	CTR	ADMITTS
/am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day/	890	-14.1%	46,690	+17.9%	37	+23.3%	1.9%	Medium
Insight: High-volume alcohol-awareness content. Entry-stage traffic that needs a clear route from educational content to Levels of Care pages (detox, residential).								
/what-ever-leaving-your-hometown-does-to-your-brain/	136	-20.5%	12,138	+35.3%	5	+66.7%	1.1%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to Levels of Care pages are the highest-ROI improvement for this traffic.								
/female-musicians-beat-addiction/	108	-47.3%	8,777	+20.9%	2	+0.0%	1.2%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to Levels of Care pages are the highest-ROI improvement for this traffic.								
/what-are-the-best-crystals-for-anxiety-and-stress/	99	-40.4%	28,529	-33.7%	7	-46.2%	0.3%	Medium
Insight: Condition-specific content attracting users researching symptoms or mental health concerns. Should route toward dual-diagnosis or appropriate Levels of Care pages.								
/what-is-the-fear-of-eating-in-front-of-others/	89	-34.1%	31,518	+3.0%	2	-33.3%	0.3%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to Levels of Care pages are the highest-ROI improvement for this traffic.								
/	85	-28.0%	8,001	-39.1%	6	+50.0%	1.1%	Medium
Insight: Primary branded entry point serving a mix of direct, branded, and first-time visitors. Should route efficiently to Levels of Care pages and the admissions path for maximum conversion.								
/meet-the-team/	68	+51.1%	1,279	-10.1%	3	+0.0%	5.3%	Medium
Insight: Trust-building page that supports credibility evaluation. Late-stage visitors — internal links to admissions and Levels of Care pages can convert this research intent.								
/how-drug-addiction-ruined-my-life/	66	-37.1%	3,940	-2.8%	2	+0.0%	1.7%	Medium
Insight: Moderate-volume substance-specific awareness content. Educational entry point that needs targeted internal links to appropriate Levels of Care pages to convert traffic.								
/understanding-the-duration-of-molly-in-your-urine/	34	-35.8%	25,518	-44.2%	3	-25.0%	0.1%	Low
Insight: Moderate-volume informational entry point with limited direct admit linkage. Awareness-stage content — internal links to Levels of Care pages are the highest-ROI improvement for this traffic.								
/is-social-media-a-drug/	33	-76.3%	2,782	-30.2%	3	+0.0%	1.2%	Medium
Insight: Moderate-volume substance-specific awareness content. Educational entry point that needs targeted internal links to appropriate Levels of Care pages to convert traffic.								

4. Levels of Care Overview

LEVEL OF CARE	PAGE	SEO SCORE	NOTES
Contact / Admissions	/contact-us	6/10	URL structure is reasonable (Contact-us). Inference: Content depth, CTA placement, and internal linking to this page should be verified before claiming full conversion readiness.
Detox	/womens-addiction-treatment-center/detoxification	6/10	URL structure is reasonable (Womens-addiction-treatment-center/detoxification). Inference: Content depth, CTA placement, and internal linking to this page should be verified before claiming full conversion readiness.
Residential / Inpatient	/addiction-during-pregnancy-and-inpatient-rehab-for-women	6/10	URL structure is reasonable (Addiction-during-pregnancy-and-inpatient-rehab-for-women). Inference: Content depth, CTA placement, and internal linking to this page should be verified before claiming full conversion readiness.
PHP / IOP	/womens-addiction-treatment-center/womens-partial-hospitalization-program	6/10	URL structure is reasonable (Womens-addiction-treatment-center/womens-partial-hospitalization-program). Inference: Content quality and internal linking effectiveness need manual review to confirm above-baseline performance.
Outpatient	/womens-addiction-treatment-center/outpatient-treatment-in-orange-county	6/10	URL structure is reasonable (Womens-addiction-treatment-center/outpatient-treatment-in-orange-county). Inference: Content quality and internal linking effectiveness need manual review to confirm above-baseline performance.
Dual Diagnosis	/womens-addiction-treatment-center/dual-diagnosis	6/10	URL structure is reasonable (Womens-addiction-treatment-center/dual-diagnosis). Inference: Content quality and internal linking effectiveness need manual review to confirm above-baseline performance.
Verify Insurance	/admissions-and-alcohol-rehab-insurance	6/10	URL structure is reasonable (Admissions-and-alcohol-rehab-insurance). Inference: Content depth, CTA placement, and internal linking to this page should be verified before claiming full conversion readiness.
Primary Location	/tour-our-rehab-facility	7/10	URL structure is reasonable (Tour-our-rehab-facility). Inference: Content quality and internal linking effectiveness need manual review to confirm above-baseline performance.

5. SEO Tier Diagnosis

Tier 1 — Trust & Eligibility	
Site is partially cleared at Tier 1 — Trust & Eligibility. Most core Levels of Care pages are confirmed present, but gaps remain: High-intent Levels of Care traffic does not land on clear primary Levels of Care page URLs. Closing these remaining gaps will complete Tier 1 and allow authority-building work to compound.	
Tier 1 — Trust & Eligibility	Partial
Findings: Verify Insurance / VOB page: Confirmed present — not found in main navigation or footer (Fact). Pages are accessible only via internal links or direct URL. Contact / Admissions page: Confirmed present — linked from main navigation (Fact). Detox Levels of Care page: Confirmed present. Residential / Inpatient Level of Care page: Confirmed present	
Inference: High-intent traffic may not be landing on clear primary Levels of Care page URLs (Inference from GSC data) — review which pages are capturing Levels of Care intent queries and whether they are conversion-optimized.	
Why It Matters: Some Tier 1 pages are confirmed, but gaps remain. Closing these will unlock the full leverage of higher-tier investment and prevent conversion leakage at the page level.	
Source: SF	
Tier 2 — Structural Authority	Blocked
Findings: Conditions hub: Not detected in crawl. Therapies hub: Not detected in crawl. H1 coverage appears adequate	
Inference: Without hub structures, condition and therapy pages may be fragmenting authority rather than consolidating it into Levels of Care pages. Hub pages create a topical map that Google uses to distribute ranking signals.	
Why It Matters: Without conditions and therapies hub structures, authority is fragmenting rather than consolidating into Levels of Care targets. This limits ranking potential for treatment-intent searches.	
Source: SF	
Tier 3 — Consolidation & Cleanup	Pass
Findings: No significant error pages detected. Thin page count within acceptable range. No significant Levels of Care page duplication	
Inference: Technical indicators are within a manageable range. Spot-check error pages and redirect chains for any suppression on key conversion pages.	
Why It Matters: Technical drag — errors, thin content, redirect chains — reduces crawl efficiency and can suppress rankings across all pages, including core conversion pages. Addressing these creates immediate headroom.	
Source: SF + GSC	
Tier 4 — Conversion & Differentiation	Unknown
Findings: About page: Not confirmed in crawl. Team / leadership page: Present. Alumni / aftercare page: Present	
Inference: Authority-stage pages are present. External credibility signals (reviews, accreditation mentions, directory listings) determine the ceiling beyond this point.	
Why It Matters: Authority-stage page coverage cannot be confirmed from available data. Manual verification of About, Team, and Alumni pages is recommended before investing in external credibility work.	
Source: SF	

6. What We Need to Do Next

CRITICAL OBSERVATIONS	
Tier 1 diagnosis: Trust & Eligibility — foundational gaps must be resolved before content or authority work will compound.	
Conversion Path Audit: Audit internal-link paths from top organic landing pages to Verify Insurance and Contact pages.	
Internal Linking — High-Traffic to Conversion: Add internal links from high-traffic pages with low admit connection to primary Levels of Care and VOB pages.	

#	INITIATIVE	TIER	TYPE	ACTION	WHY IT MATTERS
1	Conversion Path Audit GA4	Tier 1	CRO	Audit internal-link paths from top organic landing pages to Verify Insurance and Contact pages. Confirm those links exist above the fold or in body copy, and validate that GA4 event tracking is firing on the destination actions.	Conversion path gaps compound slowly: fixing them now avoids a larger pay by end of quarter (lower confidence without GA4 data). AM focus area aligns: Anchored Tides appears to be headed in the right content direction, with modality-focused pages showing enough traction.
2	Internal Linking — High-Traffic to Conversion GSC	Tier 1	Internal Linking	Add internal links from high-traffic pages with low admit connection to primary Levels of Care and VOB pages: /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day, /what-ever-leaving-your-hometown-does-to-your-brain, /female-musicians-beat-addiction, /what-are-the-best-crystals-for-anxiety-and-stress, /what-is-the-fear-of-eating-in-front-of-others.	10 pages (led by /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day/, 890 clicks) carry organic traffic with limited path to admissions — targeted internal links to Levels of Care and VOB pages are the lowest-cost lever to convert that existing traffic.
3	Content Refresh — Highest-Traffic Assisted Pages GSC	Tier 2	Content	Refresh content in the "Substance-Specific Education" cluster (82 queries) (55% of clicks) to improve engagement and strengthen links to Levels of Care pages: /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day, /what-ever-leaving-your-hometown-does-to-your-brain, /female-musicians-beat-addiction, /what-are-the-best-crystals-for-anxiety-and-stress, /what-is-the-fear-of-eating-in-front-of-others.	The "Substance-Specific Education" cluster (82 queries) (55% of clicks) drives meaningful traffic but shows medium admit connection — a larger pay by end of quarter (lower confidence without GA4 data). AM focus area aligns: Anchored Tides appears to be headed in the right content direction, with modality-focused pages showing enough traction.
4	Title & Meta Optimization Multi-source	Tier 1	Content	Audit title tags and meta descriptions on highest-impression pages to improve organic CTR: /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day, /what-ever-leaving-your-hometown-does-to-your-brain, /female-musicians-beat-addiction, /what-are-the-best-crystals-for-anxiety-and-stress.	CTR improvements on existing impression volume require no new traffic — they are free growth on what the site already earns.
5	Conditions Hub — Topical Authority Structure Multi-source	Tier 2	IA / Architecture	Create a /mental-health-or-conditions hub page with internal links to individual condition pages (depression, anxiety, PTSD, trauma, etc.). Each condition page should link back to the hub and forward to relevant Levels of Care pages, creating a clear topical cluster for Google to index.	Without a conditions hub, each condition page competes independently for authority. A hub structure consolidates topical signals, passes authority to Levels of Care pages, and gives Google a clear taxonomy — all three effects improve rankings on condition-specific queries.
6	Therapies Hub — Treatment Modality Architecture Multi-source	Tier 2	IA / Architecture	Create a /therapies-or-treatment-modalities hub page listing all therapy types (CBT, DBT, EMDR, trauma-informed care, etc.) with links to individual therapy pages. Link each therapy page back to the hub and cross-link to relevant Levels of Care pages (e.g., CBT → IOP, Trauma → PHP/Residential).	Therapy pages are strong E-E-A-T differentiators but they generate authority in isolation without a hub. Organizing them under a hub page lets Google understand the program's clinical depth, improves rankings on therapy-specific searches, and strengthens internal authority flow to conversion pages.
7	Fix Blog Display Issue	3	IA / Architecture	Troubleshoot Elementor until we can figure out why the issue is taking place, contact support if possible, and if all else fails fall back to an alternative.	Blog content needs to be surfaced on the website.

7. Suggested Keywords for Next Quarter

ABOUT THIS LIST: Showing 20 keyword opportunities, grounded in GSC query data.				
KEYWORD	SUGGESTED TYPE	TARGET	WHY IT'S SUGGESTED	SOURCE
relapse meaning / relapse definition / definition of relapse / relapse cycle diagram / addiction relapse cycle	CRO / supporting update	/relapse-definition-part-of-the-addiction-cycle	49k impressions but only 0.0% CTR on /relapse-definition-part-of-the-addiction-cycle — conversion path or meta optimization can significantly increase click capture without new content.	GSC SF
how long does molly stay in system / how long does molly stay in your urine / does molly show up on a drug test / molly drug test / how long does molly last in system drug test / how long do molly stay in your system	CRO / supporting update	/understanding-the-duration-of-molly-in-your-urine	6k impressions but only 0.1% CTR on /understanding-the-duration-of-molly-in-your-urine — conversion path or meta optimization can significantly increase click capture without new content.	GSC SF
fear of eating in front of others / phobia of eating in front of others / i don't like eating in front of people / fear of eating in public / is depnophobia an eating disorder / anxiety about eating in front of people	CRO / supporting update	/what-is-the-fear-of-eating-in-front-of-others	879 impressions but only 0.2% CTR on /what-is-the-fear-of-eating-in-front-of-others — conversion path or meta optimization can significantly increase click capture without new content.	GSC SF
best crystals for anxiety / best crystals for anxiety / crystals for anxiety and panic attacks / crystals good for anxiety / how to use healing crystals for anxiety / crystals for fear and anxiety / how to use crystals for anxiety	Optimize existing page	/what-are-the-best-crystals-for-anxiety-and-stress	669 impressions with strong existing page at /what-are-the-best-crystals-for-anxiety-and-stress — on-page optimization and internal linking can strengthen rankings further.	GSC SF
emotional sobriety definition / emotional sobriety meaning / what is emotional sobriety / emotional sobriety	Optimize existing page	/understanding-emotional-sobriety	387 impressions with strong existing page at /understanding-emotional-sobriety — on-page optimization and internal linking can strengthen rankings further.	GSC SF
lop in orange county / lop in orange county	Optimize existing page	/intensive-outpatient-program-op-for-substance-abuse-treatment	350 impressions with strong existing page at /intensive-outpatient-program-op-for-substance-abuse-treatment — on-page optimization and internal linking can strengthen rankings further.	GSC SF
how long does it take for alcohol to leave your system	Optimize existing page	/how-long-does-alcohol-stay-in-your-system	238 impressions with strong existing page at /how-long-does-alcohol-stay-in-your-system — on-page optimization and internal linking can strengthen rankings further.	GSC SF
drug addict female singer / female singer who went to rehab	Optimize existing page	/female-musicians-beat-addiction	200 impressions with strong existing page at /female-musicians-beat-addiction — on-page optimization and internal linking can strengthen rankings further.	GSC SF
is social media a drug / social media is a drug / is social media like a drug?	Optimize existing page	/is-social-media-a-drug	194 impressions with strong existing page at /is-social-media-a-drug — on-page optimization and internal linking can strengthen rankings further.	GSC SF
alcohol withdrawal symptoms / alcohol withdrawal / how long does alcohol withdrawal last	Optimize existing page	/am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day	191 impressions with strong existing page at /am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day — on-page optimization and internal linking can strengthen rankings further.	GSC SF
anchored recovery community	Optimize existing page	/	162 impressions with strong existing page at / — on-page optimization and internal linking can strengthen rankings further.	GSC SF
huntington beach sober living	Optimize existing page	/sober-living-for-women-in-huntington-beach	162 impressions with strong existing page at /sober-living-for-women-in-huntington-beach — on-page optimization and internal linking can strengthen rankings further.	GSC SF
recovery cycle / cycle of recovery	Create new content	/blog/recovery-cycle	173 impressions this quarter with no existing page capturing this query — new content would close the gap between search demand and site coverage.	GSC
activated charcoal for the detox	Create new content	/blog/activated-charcoal-for-the-detox	108 impressions this quarter with no existing page capturing this query — new content would close the gap between search demand and site coverage.	GSC
denial in recovery	Create new content	/blog/denial-in-recovery	85 impressions this quarter with no existing page capturing this query — new content would close the gap between search demand and site coverage.	GSC
do alcoholics drink every day	Internal linking support	/am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day	/am-i-an-alcoholic-can-you-be-an-alcoholic-and-not-drink-every-day ranks for treatment-intent queries but likely lacks strong internal link support from blog posts, topical pages, and supporting content — improving internal link paths to this page will pass authority, deepen crawl coverage, and strengthen its rankings for high-value queries.	GSC SF
mental health conditions / dual diagnosis / co-occurring disorders	Create hub page	/mental-health	No conditions hub detected in the current site crawl — a mental-health hub consolidates topical authority for condition-specific queries (depression, anxiety, trauma, PTSD), passes link equity to Levels of Care pages, and gives Google a clear taxonomy for ranking treatment-intent searches.	SF
internal link architecture audit	Technical SEO fix	site-wide internal link graph	Scramling blog crawl data enables a full internal link audit — pages receiving fewer than 3 internal links are at risk of being under-crawled and under-ranked. Mapping link paths from high-traffic top-of-funnel pages to Levels of Care conversion pages improves crawl depth and strengthens authority flow where it matters most.	SF
page metadata completeness	Technical SEO fix	meta description audit	A systematic meta description audit using the Scramling Pro crawl export ensures all Levels of Care and conversion pages have keyword-targeted descriptions — meta descriptions directly influence CTR on branded and treatment-intent queries where click competition is high.	SF
Core Web Vitals / page speed	Technical SEO fix	performance & UX audit	Core Web Vitals (LCP, CLS, INP) are confirmed Google ranking signals — a performance audit identifies pages where slow load times or layout instability are suppressing rankings for treatment-intent queries. Improving scores on Levels of Care pages reduces bounce and improves both rankings and admissions conversions.	GSC

8. What We Track

FOCUS AREA	METRIC	SOURCE	WHY IT MATTERS
Conversion Rate	Organic conversion rate on top landing pages	GA4	Higher CVR on existing traffic is the most capital-efficient growth lever
Internal Link Effectiveness	Click-through from informational pages to Levels of Care and VOB pages	GA4	Measures whether internal linking strategy converts existing traffic to admissions pages
Content Performance	CTR improvement on high-impression non-brand queries	GSC	CTR gains on existing impressions drive incremental traffic without new content
Organic Sessions	Total organic sessions (QoQ)	GA4	Primary volume indicator for organic channel health
Qualified Calls	Organic phone calls (answered, 60s+)	CallRail	Strongest proxy for admits when direct admit tracking is unavailable

9. Additional Opportunities

UPSELL Custom Authority-Building Initiative	
Core Levels of Care pages are confirmed present — Detox, IOP, Outpatient, and Dual Diagnosis pages are live and indexed. Domain authority is now the primary ceiling on where those pages rank for competitive treatment terms. The standard content roadmap addresses what to publish; a focused authority program removes the ranking ceiling.	
EVIDENCE	
Core Levels of Care pages confirmed present — site has cleared most Tier 1 structural requirements. Domain authority is now the primary ceiling on competitive treatment-term rankings.	
1 confirmed high-intent topic cluster identified — authority, not content volume, is the primary ranking constraint on these terms	
RECOMMENDATION	
A focused link acquisition or digital PR program targeting high-intent Levels of Care pages. This is a deeper SEO investment than the standard monthly retainer covers, designed to remove the authority ceiling that content production alone cannot lift.	
Recommended when authority — not content output or keyword strategy — is the confirmed bottleneck. Link acquisition and digital PR address a constraint that standard scope cannot resolve.
